# CONFIGURATION FEATURES & PRODUCT PEDIGREE

## Modular

- Hexagonal mast section, good stability and strong bending resistance;
- Guided assembly, quick assembly.

## Boom

- Large cross-section high stiffness boom, external connecting rod, through-shaft connection;
- Small shaking, stable operation;
- Two-stage design, guided assembly.

## Base

- High-strength steel composite box-type cylindrical structure, structurally reliable;
- Rotating support bolts are symmetrically distributed on both the inner and outer sides of the cylinder, ensuring balanced force and structural stability;
- Pin connection of modular section, quick-disconnect and easy for maintenance.

## Hydraulic system

- Full-process filtration technology, high system cleanliness, and reliability;
- Load-sensitive technology, paired with secondary pressure limiting function, ensures low energy consumption and high efficiency of the system;
- High precision of the proportional multi-way valve

## Control

- Enclosed electrical box is safe and reliable;
- Wireless remote control provides convenient operation;

## Self-climbing

- Mature hydraulic cylinder jacking technology;
- Quick operation, easy maintenance;
- Stable, reliable, and safe self-climbing.

## xs28B

Horizontal reach	m	28.12
Reach depth	m	23.24
Number of sections		4
Slewing range	°	370
Pipeline diameter	mm	125
End hose	m	3
Maximum independent height	m	24
Boom weight	kg	2732
Base weight	kg	4012

## xs32B

Horizontal reach	m	31.42
Reach depth	m	25.57
Number of sections		4
Slewing range	°	370
Pipeline diameter	mm	125
End hose	m	3
Maximum independent height	m	24
Boom weight	kg	3001
Base weight	kg	4037
